

Application

The chemical process pump "JKPC" is widely used for chemical, petrochemical industries. Media which can be easily pumped are acid, caustic, ammonia, phosphate, dyes oils, solvents alcohol, aromatics etc. Also suitable for textile, food, paper & pulp, pharmaceuticals, etc.

Range

Max. Capacity : 400 M³ /hr. max.
Head : 150 mtr.
Pressure : upto 16 bar
Temperature : 200°C
Material : Closed / Semi Open
Flanges : As per ISO 7005 & ANSI-B-16.5 Pn16

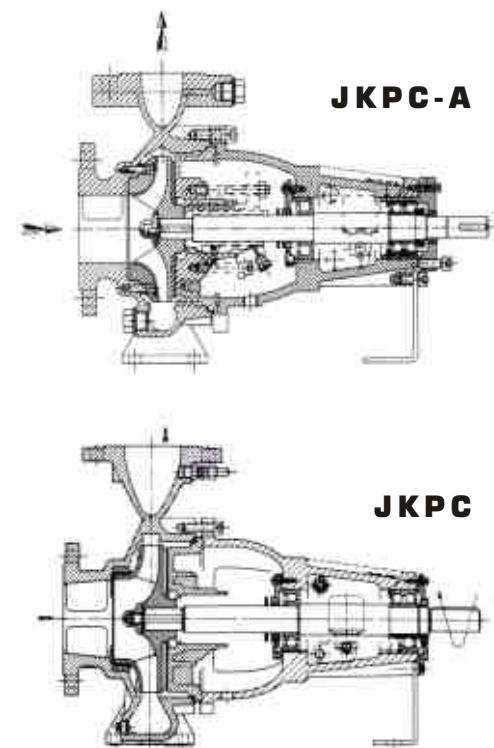

Design

The Chemical process pump type JKPC, JKPC-A is an end suction, horizontal back pull out designed pump with accordance to DIN-24256/ISO-2858

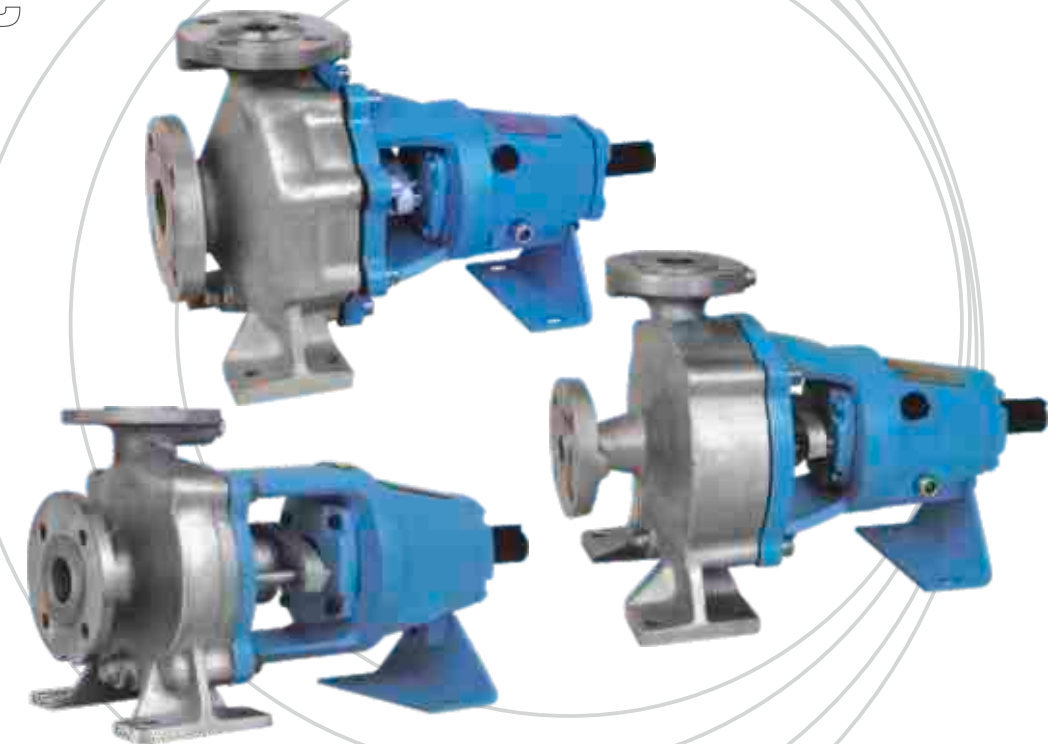

Seal Arrangement

Soft gland packing arrangement with provision for flushing and sealing liquid connection. Also available with jacketed st. box for high temp. Mechanical seal internal / external arrangement with provision for API sealing plans.

As we are constantly endeavoring to improve the performance of our products / equipments, we therefore reserve to modify pumps shown in this brochure without notice.

Chemical Process Pump Type JKPC

One For All
